**SACRAMENTO**— California added 393,000 new residents in 2009, putting the state's January 1<sup>st</sup> population total at 38,648,000 according to the latest population report released today by the California Department of Finance.

The report shows preliminary January 2010 and revised January 2009 population data for the cities. Highlights include:

The City of Fresno topped 500,000 in population during 2009. More than 7,000 new residents were in the calendar year, putting the city's population at 502,303 – which ranks the Central Valley city as California's fifth largest. Fresno's growth during the year was driven by the addition of 1,319 housing units.

California's statewide housing growth in 2009 reflects the downturn in the housing industry by only adding 62,385 housing units. Finance's annual survey shows a steady reduction in residential construction since the peak year of 2005, when the state added 197,477 new units; in 2006, 172,458 units were added; in 2007, there were 131,823 additional units; and in 2008, only 86,492 were added. These estimates are based on the annual housing unit change surveys Finance collects directly from local governments.

The decline in single-family detached homes continued in the current year as well, decreasing by 40 percent from last year. In 2008 the state added 39,596 single-family detached homes, but only 23,637 were built in 2009.

Los Angeles has reached a population of 4,094,764, growing by more than 44,000 persons during the year – a rate more than twice the growth of California's second largest city, San Diego. San Diego now has a population of 1,376,173, adding more than 17,000 persons during the year.

The City of Colfax in Placer County ranked as the fastest growing city in California, increasing by 5.7 percent. The next four fastest growing cities were Beaumont in Riverside County (5.5 percent), Sand City in Monterey County (5.4 percent), Coachella in Riverside County (3.8 percent), and Oakley in Contra Costa County (3.3 percent). These cities added a proportionally large number of new residents from recent housing increases or from occupancy resulting from previously reported housing units.

**- MORE -**

The biggest numeric increases typically occurred in some of the state's largest cities – Los Angeles (44,037), San Diego (17,041), San Jose (16,237), and San Francisco (9,485).

The 2009 report lists 480 California cities, of which 445 had gains in population, five experienced no change, and 30 lost population.

The City of Oxnard in Ventura County also reached a landmark in this report: with 200,004 residents, Oxnard became the 21th California city to exceed 200,000 in population.

Since the April 1, 2000 census, the top four fastest growing California cities have more than doubled in size, including Lincoln in Placer County (267 percent), Beaumont and Murrieta in Riverside County (201 percent and 129 percent respectively), and Brentwood in Contra Costa County (125 percent).

Other highlights include:

The 2009 relocation of California's prison population among various facilities within California, and to other states, resulted in the overall number of incarcerated persons declining for the third year in a row, down by 3,189 to 181,964 inmates statewide. The largest prison declines occurred in Soledad (-734) in Monterey County, Chino (-612) in San Bernardino County, Chowchilla (-486) in Madera County, and Corcoran (-437) in Kings County. Unincorporated Lassen County (+386), Blythe (+362) in Riverside County, and Avenal (+230) in Kings County had notable gains in prison population.

Background Information:

These population estimates are produced annually by the Department of Finance for use by local areas to calculate their annual appropriations limit. The State Controller's Office uses Finance's estimates to update their payment population figures for distribution of state subventions to cities and counties, and to comply with various state codes. Additionally, estimates are used for research and planning purposes by federal, state and local agencies, the academic community and the private sector.

Changes to the housing stock are used to prepare the annual city population estimates presented in this report. Estimated occupancy of housing units and the number of persons per household further determine population levels. Changes in city housing stocks result from new construction, demolitions, housing unit conversions, and annexations. The sub-county estimates are then controlled to independently produced county estimates.

These population estimates do not incorporate 2010 census counts. Finance's January 1, 2011 population estimates will include the results of the 2010 census.

Related population reports are available on the Department's website:
